## New Cummins® ISF 3.8L Pistons and Piston Kits

November 18, 2016

Federal-Mogul Motorparts announces the availability of new FP Diesel **Pistons and Piston Kits** for the Cummins ISF 3.8L engine, 102MM bore. The ISF 3.8L engine is used in a variety of applications including Light & Medium Duty Trucks, Vans, Pickups and Utility Vehicles. See below for CPL coverage.

Our piston kits include pistons, piston rings, pins and retainers, and are available in three different sizes -- Standard, 0.50MM and 1.00MM oversize. We also offer a repair sleeve to return the bore to standard size.

FP Diesel ISF 3.8L pistons are made in our own factory using the latest manufacturing technologies. We control all critical processes from casting to final machining. The alfin insert bond is checked ultrasonically to insure optimal performance. A manganese phosphate coating is added to reduce friction and wear, and protect against scuffing during break-in.
